

C-Axis Inc.
 Contract Manufacturing
 MINNESOTA · PUERTO RICO

Customer Development Center

C-Axis is a full service contract manufacturer that is looking to partner with the medical device industry on the development of new technologies in the industry. Providing a separate facility for pure prototyping and development activity, C-Axis is looking forward to improving our customer's timelines on their Research and Development projects. Imagine doing design iterations in days vs. months. Onsite development with immediate DFM and capability feedback. Here is how we can help your R&D team:

Capabilities we focus on for same day prototyping:

Cutting Edge Swiss Machining Capability

Perfect for: Catheter components (electrodes, rings, etc), small implantable devices (TAVR Valve components, ASD, filter, etc.), delivery components (Delivery screws, Handle components, Needle and Trocar, Sharp tip, etc.)

Cutting Edge Milling & Turning - Capability

Perfect for: Heart pump cases, Orthopedic devices, Spinal Devices, CRM & Neuro Battery cases, Manufacturing aids and other device needs.

Next Generation Additive Machining (Metal 3D printing) Capability

Polymer 3D printing

Wire and Sinkers EDM

Laser Manufacturing Cutting, welding, and marking

What C-Axis provides:

- ◆ **Equipment and a prototyping engineer and a technician**
- ◆ **Available Materials for quick turn prototyping iterations**
- ◆ **Manufacturing Experts to assist with design for manufacturability from the first prototype discussion**
- ◆ **Program management for design history file and project management assistance**
- ◆ **Process development and transition to production assistance**
